| <i>Notes on Contributors</i>  | viii |
| <i>Editors' Introduction</i>  | xi   |
| <b>Part I The Methodology and Philosophy of Applied Econometrics</b>  |      |
| 1 The Methodology of Empirical Econometric Modeling: Applied Econometrics Through the Looking Glass                               | 3    |
| <i>David F. Hendry, Nuffield College, Oxford University</i>   |      |
| 2 How Much Structure in Empirical Models?   | 68   |
| <i>Fabio Canova, Universitat Pompeu Fabra</i>   |      |
| 3 Introductory Remarks on Metastatistics for the Practically Minded Non-Bayesian Regression Runner                                | 98   |
| <i>John DiNardo, University of Michigan</i>   |      |
| <b>Part II Forecasting</b>  |      |
| 4 Forecast Combination and Encompassing   | 169  |
| <i>Michael P. Clements, Warwick University, and David I. Harvey, School of Economics, University of Nottingham</i>                |      |
| 5 Recent Developments in Density Forecasting  | 199  |
| <i>Stephen G. Hall, University of Leicester, and James Mitchell, National Institute of Economic and Social Research</i>           |      |
| <b>Part III Time Series Applications</b>  |      |
| 6 Investigating Economic Trends and Cycles  | 243  |
| <i>D.S.G. Pollock, University of Leicester</i>  |      |
| 7 Economic Cycles: Asymmetries, Persistence, and Synchronization  | 308  |
| <i>Joe Cardinale, Air Products and Chemicals, Inc., and Larry W. Taylor, College of Business and Economics, Lehigh University</i> |      |
| 8 The Long Swings Puzzle: What the Data Tell When Allowed to Speak Freely   | 349  |
| <i>Katarina Juselius, University of Copenhagen</i>  |      |
| 9 Structural Time Series Models for Business Cycle Analysis   | 385  |
| <i>Tommaso Proietti, University of Rome 'Tor Vergata'</i>   |      |
| 10 Fractional Integration and Cointegration: An Overview and an Empirical Application   | 434  |
| <i>Luis A. Gil-Alana and Javier Hualde, Universidad de Navarra</i>  |      |

**Part IV Cross-section and Panel Data Applications**

|    |  |     |
|----|--|-----|
| 11 | Discrete Choice Modeling   | 473 |
|    | <i>William Greene, Stern School of Business, New York University</i>   |     |
| 12 | Panel Data Methods and Applications to Health Economics  | 557 |
|    | <i>Andrew M. Jones, University of York</i>   |     |
| 13 | Panel Methods to Test for Unit Roots and Cointegration   | 632 |
|    | <i>Anindya Banerjee, University of Birmingham, and Martin Wagner, Institute for Advanced Studies, Vienna</i> |     |

**Part V Microeconometrics**

|    |  |     |
|----|--|-----|
| 14 | Microeconometrics: Current Methods and Some Recent Developments                | 729 |
|    | <i>A. Colin Cameron, University of California, Davis</i>                       |     |
| 15 | Computational Considerations in Empirical Microeconometrics: Selected Examples | 775 |
|    | <i>David T. Jacho-Chávez and Pravin K. Trivedi, Indiana University</i>         |     |

**Part VI Applications of Econometrics to Economic Policy**

|    |  |     |
|----|--|-----|
| 16 | The Econometrics of Monetary Policy: An Overview   | 821 |
|    | <i>Carlo Favero, IGIER-Bocconi University</i>  |     |
| 17 | Macroeconometric Modeling for Policy   | 851 |
|    | <i>Gunnar Bårdsen, Norwegian University of Science and Technology, and Ragnar Nymoen, University of Oslo</i> |     |
| 18 | Monetary Policy, Beliefs, Unemployment and Inflation: Evidence from the UK                                   | 917 |
|    | <i>S.G.B. Henry, National Institute of Economic and Social Research</i>                                      |     |

**Part VII Applications to Financial Econometrics**

|    |  |      |
|----|--|------|
| 19 | Estimation of Continuous-Time Stochastic Volatility Models   | 951  |
|    | <i>George Dotsis, Essex Business School, University of Essex, Raphael N. Markellos, Athens University of Economics and Business, and Terence C. Mills, Loughborough University</i> |      |
| 20 | Testing the Martingale Hypothesis  | 972  |
|    | <i>J. Carlos Escanciano, Indiana University, and Ignacio N. Lobato, Instituto Tecnológico Autónomo de México</i>   |      |
| 21 | Autoregressive Conditional Duration Models   | 1004 |
|    | <i>Ruey S. Tsay, Booth Business School, University of Chicago</i>  |      |
| 22 | The Econometrics of Exchange Rates   | 1025 |
|    | <i>Efthymios G. Pavlidis, Ivan Paya, and David A. Peel, Lancaster University Management School</i>   |      |

|  |  |      |
|--|--|------|
| <b>Part VIII Growth Development Econometrics</b> |  |      |
| 23   | The Econometrics of Convergence<br><i>Steven N. Durlauf, University of Wisconsin-Madison,<br/>Paul A. Johnson, Vassar College, New York State, and<br/>Jonathan R.W. Temple, Bristol University</i>                          | 1087 |
| 24   | The Methods of Growth Econometrics<br><i>Steven N. Durlauf, University of Wisconsin-Madison,<br/>Paul A. Johnson, Vassar College, New York State, and<br/>Jonathan R.W. Temple, Bristol University</i>                       | 1119 |
| 25   | The Econometrics of Finance and Growth<br><i>Thorsten Beck, European Banking Center, Tilburg University, and CEPR</i>  | 1180 |
| <b>Part IX Spatial Econometrics</b>              |  |      |
| 26   | Spatial Hedonic Models<br><i>Luc Anselin, School of Geographical Sciences and Urban Planning,<br/>and Nancy Lozano-Gracia, GeoDa Center for Geospatial<br/>Analysis and Computation, Arizona State University</i>            | 1213 |
| 27   | Spatial Analysis of Economic Convergence<br><i>Sergio J. Rey, Arizona State University, and Julie Le Gallo,<br/>Université de Franche-Comté</i>  | 1251 |
| <b>Part X Applied Econometrics and Computing</b> |  |      |
| 28   | Testing Econometric Software<br><i>B.D. McCullough, Drexel University</i>  | 1293 |
| 29   | Trends in Applied Econometrics Software Development 1985–2008:<br>An Analysis of <i>Journal of Applied Econometrics</i> Research Articles,<br>Software Reviews, Data and Code<br><i>Marius Ooms, VU University Amsterdam</i> | 1321 |
|  | <i>Author Index</i>  | 1349 |
|  | <i>Subject Index</i>   | 1374 |
